Every hour of every day of the year, someone dies of melanoma. It is the most common form of cancer in the United States. More than 3.5 million skin cancers in more than 2 million people are diagnosed annually with approximately 5700 deaths in men and 3000 in women. Over the past 31 years, more people have had skin cancer than all other cancers combined. Melanoma strikes people of all ages, races, all economic levels and both sexes. While melanoma is the most deadly form of skin cancer, it is also highly preventable and treatable if caught early. Sadly, there is no cure for this aggressive disease.

We invite you to join us in our quest for a melanoma cure by making a donation to the Bill Walter III Melanoma Research Fund. You can make a difference. All donations are tax deductible and no amount is too small. Please accept our gratitude.
